# HEALTHCARE

# Security & Automation Division Healthcare

## Introducing Technology in Healthcare

In a fast-growing and changing industry, adopting advanced technology helps you keep up with increasing demand and quality of health care requirements. Collaborative care and increased patient outreach help to improve treatment. Improved communication amongst your hospital or physician network, as well as global medical, pharmaceutical and research partners, aid you in providing the best care possible.

Technostream provide world class systems from the world's leading manufacturers to help you and your hospital staff in providing a better and more efficient service. We believe that technology must play a central role to maintain costs, improve access, and save lives.

Technostream interest in serving the healthcare sector comes from the founder's passion in the domain of healthcare and his contribution in providing better services and equipment through our sister company German Medical Supplies (GMS).

Technostream is specialized in security and automation systems. We bring our experience in all the vertical markets and implement it for the sake of best practice in the healthcare domain.

Technostream can provide the below services for hospitals and medical centers:

- Nurse call system
- Wireless Nurse call system
- Asset tracking
- Staff tracking
- Infant protection
- CCTV
- Access Control Systems
- Public Address System
- Communication infrastructure.
- GPS Fleet tracking and Management
- High security locking systems

Technostream provides solutions not products. With the available in-house engineering and technical team, Technostream can provide design, supply, install, test,

commission, and maintain any scale of ELV project in the healthcare domain.

## Maintenance and Support

Technostream has a 24/7 maintenance team ready to support our partners immediately within less than 2 hours all over the major cities of the UAE and KSA.

## Commitment to the Environment

Technostream is committed to a sustainable environment and design systems with minimum ecological impact. Following the guidance of Technostream founder, the managing team at Technostream is always on the look for greener strategies and technologies. To be an

example, Technostream has implemented in-house policies to insure a more sustainable work environment. Wherever it is possible we tend to propose eco friendly systems, and guide our clients towards ecologically sustainable solutions.

## Vision & Mission

### Vision

"Technostream shall lead organizations, people and communities towards advanced, modular, and sustainable solutions and services."

### Mission

"To be a prime provider of designing, implementing, maintaining and integrating smart and sustainable security and automation solutions while granting all stakeholders continuous profit and growth"

## Value Proposition

- 01 Financially strong and stable.
- 02 In-house engineering team
- 03 Client oriented and non-vender specific
- 04 Partnership with world leading manufacturers
- 05 Local availability all over the GCC
- 06 One-stop-shop for a wide range of ELV system
- 07 24/7 Maintenance and support services
- 08 Track recored in on-time project completion

Technostream support and service teams are available all over UAE and in the below KSA regions:

**Al Riyadh | Jeddah | Al Dammam | Makkah | Jizan | Najran**
